

Pack and Ship

Version 1.4
Effective date: 12 January 2026

Purpose

This procedure starts when an order is released to the floor and ends when the carton is staged for the carrier.

Procedure

Step	Role	Action	Routing
1	Picker	Pick the items on the order from the pick face into the order tote.	Continue to step 2
2	Packer	Count the items in the tote against the order.	Continue to the decision in step 3
3	Packer	Decide whether the count matches the order.	If the count matches, go to step 5. If the count does not match, go to step 4.
4	Picker	Correct the pick and return the tote to the Packer.	Return to step 2
5	Packer	Seal the carton and apply the shipping label.	Continue to step 6
6	Shipper	Stage the carton in the carrier lane for collection.	The procedure ends
7	Not named	Record a shortage on the exception log when an item is missing from the pick face.	The procedure does not state who records the shortage.
